## Food diary main page

Users are able to log their meals according to breakfast, lunch, dinner, and snacks

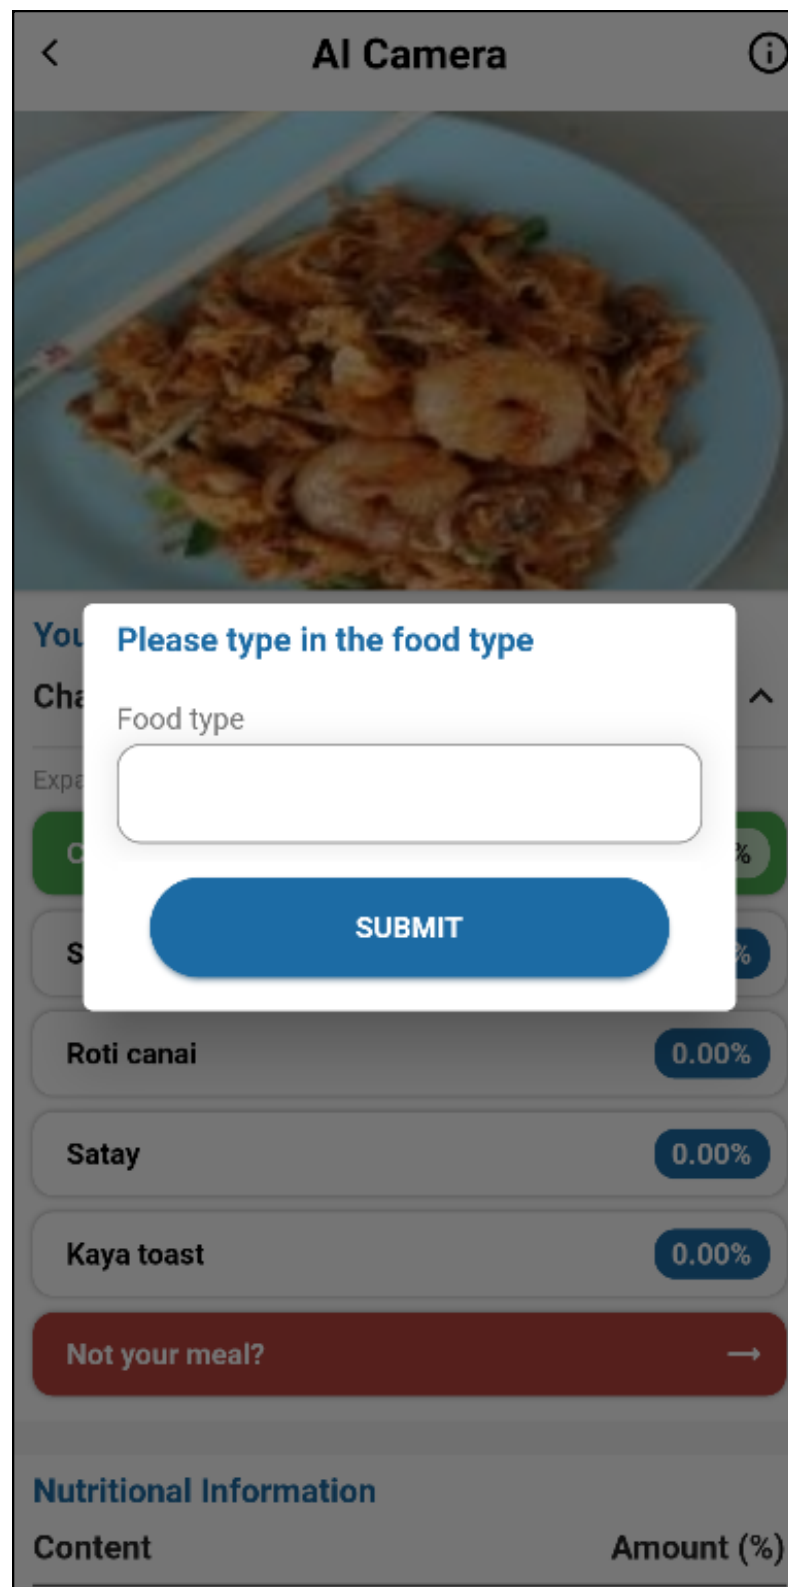

## Photo Logging

Users are able to choose to take a photo or choose picture from gallery

## Meal Info Page

- Able to classify different food types and show their corresponding nutritional information
- Shows top 5 predictions and able to choose between them

## Meal Info Page (wrong / missing food type)

- Able to manually input food types in case of wrong/missing food type
- New food type and its image will be stored inside the database for further model training
